DUOS TECHNOLOGIES LAUNCHES INTERNATIONAL SUBSIDIARY

Duos Technologies, Inc. of Jacksonville, Fl. announces the formation of Duos Technologies International, Inc. a subsidiary created to drive Duos' expansion into the global defense and security markets. Stephanie Jason, who merged her firm IFCG, Inc. into Duos Technologies International, was elected as the company's president. Mrs. Jason brings to Duos an extensive career in international business development in the fields of defense and security, IT, oil and gas, and infrastructure, having secured over 1 billion in global contracts for major multinational and Fortune 500 corporations. "We are excited that we were able to get a seasoned executive of Mrs. Jason's caliber to head up our effort of taking Duos Technologies global. Our unique systems and our ability to integrate the most complex and sophisticated security and process technologies into our proprietary platform will greatly expand the defense mechanisms protecting critical infrastructure and assets around the world", says Gianni B. Arcaini, Chairman & CEO of Duos Technologies, Inc..

Duos Technologies International will provide a broad range of turn-key technology based systems for security, remote surveillance and automation for both the private and government sectors, transcending traditional security measures with state-of-the-art artificial intelligence driven technologies including video analytics, a broad spectrum of sensing technologies to provide local and remote real-time awareness of potential threats, 3D immersive monitoring and surveillance platforms, wireless technologies, customized interfaces, data storage and management, and secure network architecture.

"Some of our eminent priorities will be to assemble an international team of experts in the field of defense, intelligence and homeland security, that can help us educate the various stakeholders entrusted with protecting critical assets and infrastructure. Our existing relationships with various governments and National Oil Companies in various Middle Eastern and African countries will allow us to address the appropriate audience very quickly and facilitate a running start to Duos Technologies International. We are also considering the formation of a global advisory board to help us understand the subtleties of different challenges facing the international community.", adds Mrs. Jason, "we want to effectively address threats worldwide using Duos Technologies' sophisticated artificial intelligence-based systems to enhance human efforts, and with demonstrable ROI for our clients."

Duos Technologies, Inc, the parent company, delivers advanced technology solutions in homeland security, transportation, commercial and industrial sectors, and healthcare. Utilizing proprietary analytics, sensing and tracking systems, Duos distributes real time information over local and wide-area networks to provide real time data to and from anywhere in the world. Duos Technologies and Duos Technologies International are headquartered in Jacksonville, Florida. For more information visit www.duostech.com or contact Duos at (904) 296-2807.
