duos TECHNOLOGIES INTERNATIONAL, INC.

**INTERNATIONAL COUNTERTERRORISM EXPERT TO HEAD UP DUOS TECHNOLOGIES
INTERNATIONAL OPERATIONS AND BUSINESS DEVELOPMENT TEAM**

Stephanie Jason, president of Duos Technologies International, Inc. and Gianni B. Arcaini, Chairman & CEO of Duos Technologies, Inc. are proud to announce the election of Mr. Charles Goslin as Vice President, Operations, Duos Technologies International. Before joining Duos, Mr. Goslin enjoyed an extensive and distinguished career as a Foreign Service Officer with the U.S. Department of State, where for 27 years he developed and implemented management and international policy programs in direct support of priority U.S. national security objectives.

“We are excited to attract an individual of Mr. Goslin’s caliber to head up our international operations and business development team. Charles’ unique blend of technical, engineering, security assessment and analytical skills in foreign affairs as well as in the areas of counterterrorism and regional security clearly make him the man for the job.”, says Gianni B. Arcaini, Chairman & CEO of Duos Technologies, Inc., “Charles’ knowledge of international terrorism threat patterns combined with Duos’ ability to develop complex security systems based on artificial intelligence will provide comprehensive technology solutions for the protection of our global customers’ critical infrastructures.”

“Several large-scale proposals are nearing completion. These will be presented to international clients within the next 60 days,” adds Mrs. Jason, “Our new team has been instrumental in assessing threat and risk scenarios and designing comprehensive solutions for the full protection of these vulnerable assets.”

Duos Technologies International provides a broad range of turn-key technology based systems for security, remote surveillance and automation for both the private and government sectors, transcending traditional security measures with state-of-the-art artificial intelligence driven technologies including video analytics, a broad spectrum of sensing technologies to provide local and remote real-time awareness of potential threats, 3D immersive monitoring and surveillance platforms, wireless technologies, customized interfaces, data storage and management, and secure network architecture.

Duos Technologies, Inc, the parent company, delivers advanced technology solutions in homeland security, transportation, commercial and industrial sectors, and healthcare. Utilizing proprietary analytics, sensing and tracking systems, Duos distributes real time information over local and wide-area networks to provide real time data to and from anywhere in the world. Duos Technologies and Duos Technologies International are headquartered in Jacksonville, Florida. For more information visit www.duostech.com or contact Duos at (904) 296-2807.
