Duos Receives Contract to Secure Vital Medical Facility with Intelligent Video Platform

High Value Award Will Ensure Protection of Critical Assets and Increase Patient Safety

JACKSONVILLE, FL, May 19, 2008 – Baptist Health South Florida has engaged Duos Technologies, Inc. to deploy its current generation of **PRAESIDIUM**® intelligent video platform to secure a substantial outpatient medical facility in Dade County. For Duos, the award is the latest in a series of large-scale contracts from the healthcare industry, one of its key vertical markets.

The system design for the facility uses Duos' **PRAESIDIUM**® intelligent video platform as the foundation for a command and control environment that combines closed circuit video surveillance devices, security operational protocols, and the existing IT infrastructure. The result is a tight and well-managed security system.

This project implementation is part of an ongoing transition by Baptist Health to Duos' intelligent video platform and builds on an established systems base that protects Baptist facilities, personnel, patients, and visitors.

"We are pleased to once again be working with Duos to secure our facilities," states Jim Denny, Director of Security for Baptist Health South Florida. "The relationship with Duos is a long-standing one as the company consistently provides us with cutting edge technology as well as a proven track record in producing on-time and reliable results with both product and service. The support we receive from Duos ranks them high among our vendors and we anticipate a continued strong relationship with the company."

"Our partnership role, formed around assisting Baptist Health South Florida to execute its mission statement by addressing the corporate wide security concerns of its patients, staff, and visitors, remains firm," said Gianni Arcaini, Chairman and CEO of Duos. "Our systems provide our customers with cutting edge technologies as a tool to focus on their ever increasing critical infrastructure security needs."

Duos Technologies Inc., headquartered in Jacksonville, Florida, provides a broad range of sophisticated technology solutions with an emphasis on Homeland Security. Cybrinth, Inc. (Washington, D.C.) is the company's logic security division. Duos' systems are based on its proprietary object detection and behavioral analysis software, managed by the company's multi-layer control platform, allowing seamless integration of a myriad of sensing technologies into a unified command and control interface. Its comprehensive automated systems also play a meaningful role in the transportation, petrochemical, and healthcare industries.
