

FOR IMMEDIATE RELEASE

DUOS TECHNOLOGIES EXECUTIVE DISCUSSES BORDER SECURITY AT RAILWAY FORUM

JACKSONVILLE, FL, February 1, 2008 –Rail and intermodal freight carriers were advised to exploit advances in security technology at a panel discussion held during the recent *2008 Railway Security Forum and Expo* in Crystal City, VA. Larry Strach, Executive Vice President of Engineering for Duos Technologies, Inc. participated in the Border Security panel, presenting a range of technological solutions to address security-related transportation issues.

Extra vigilance is a business necessity for rail freight carriers, who face long-standing concerns of vandalism, theft, and illegal ridership, aggravated by the contemporary problems of drug trafficking, terrorism, and illegal immigration, and the need to respond to DHS mandates. Mr. Strach addressed these issues in his presentation, along with the significant costs and schedule delays that can accompany them. He highlighted the use of video analytics and multi-sensor technologies to provide real-time situational awareness in railroad security applications, offering examples of successful industry deployments.

The Forum drew attendees from the major U.S. rail freight carriers as well as representatives from government and the private sector. It featured a powerful roster of speakers, including Congressman Elijah Cummings of the House Committee on Transportation and Infrastructure. Duos Technologies also participated in the Railway Security Expo that was held in conjunction with the Forum.

Duos Technologies Inc., headquartered in Jacksonville, Florida, provides a broad range of sophisticated technology solutions with an emphasis on Homeland Security. Its systems are based on its proprietary object detection and behavioral analysis software, managed by the company's multi-layer control platform, allowing seamless integration of a myriad of sensing technologies into a unified command and control interface. Its comprehensive automated systems also play a meaningful role in the transportation, petrochemical, and healthcare industries.

Duos Technologies is a global leader in security and surveillance-based systems.
