

alis[®] Automated Logistics Information System

Fast Track Your Distribution Centers Through Automation, Technology, and Integration

Automate driver authentication

*Expedite check in / check out process and
integrate data to enable queries*

duostech
connected intelligence

Overview

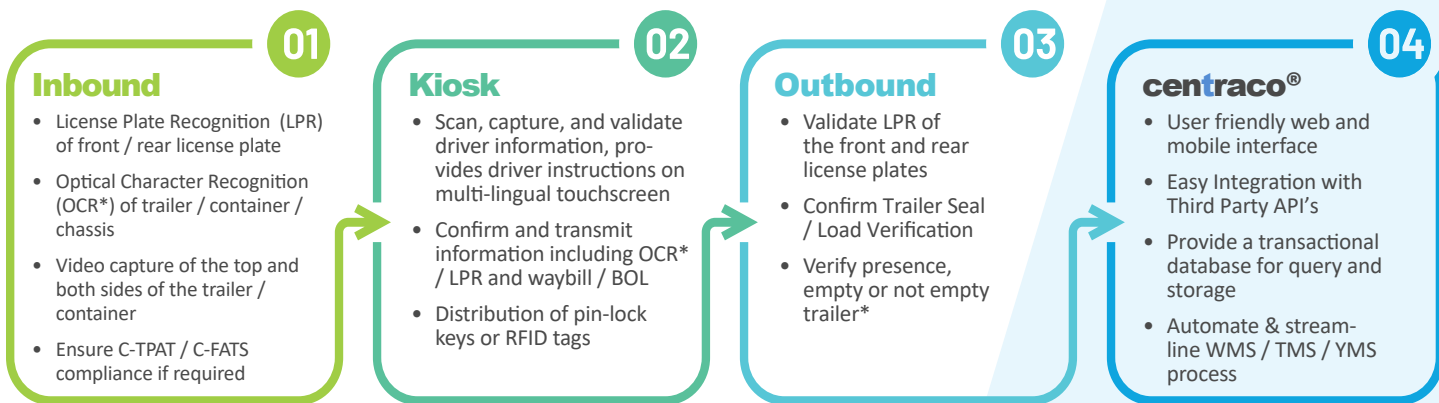

The **alis**® system automates the distribution center gatehouse operations and leverages technology as a force multiplier to achieve economies of scale.

Duos Technologies replaces traditional gatehouse operations with turn-key deployment of an intelligent, multi-sensor system that eliminates manual processes and uses our **centraco**® web based and mobile applications to consolidate data query and storage.

Eyes On Hands Off

>>> fast track your distribution centers through **automation**, & **technology integration**

How it Works

* A.I. enhanced module

System Benefits
